

Alba

Going to great lengths to make an entrance

- Exceptionally durable carpet made from ECONYL®, a recycled nylon material made from discarded fishing nets and other sources.
- Ideal for high volume entrance areas, such as walkways and corridors.
- Nylon pile is highly absorbent and also withstands crushing.
- An effective way to protect interior floor surfaces.
- Available with optional edging depending on the requirements of the application.
- Suitable for glue down, wall to wall, or floor surface applications.
- Can be used as part of a two step system in heavy traffic environments.

Technical Specification

Material:	ECONYL® Regenerated Nylon
Backing:	PVC
Surface Finish:	Cutpile
Product Height:	9.2mm
Roll Length:	20m
Pile Height:	5.2mm ± 0.5
Mat Edge:	25mm thickness
Durability:	Medium to heavy traffic entrances
Absorbency:	5l/m ²
Pile Yarn Composition:	100% PA6
Pile Weight:	900g/m ²
Flame Retardancy:	Fire tested to Cfl-S1 EN 14041
Permanent Adhesive Recommendation:	Adhesive recommended by F.Ball for permanent bond: F45, and for heavy-duty/wet areas: F74, F81 or F84
Country of Origin:	Netherlands
