

Fatigue-Step Edges B1

- This edging is B1 fire-tested. Because of the durability of the rubber used to make Fatigue-Step, it can be used in a range of environments.
- Each edge piece exactly interlocks with the tile system when used as a loose-laid floor covering for Fatigue-Step, making the edging a great design solution.
- In order to reduce trip hazards, the edging is offered in a bright yellow colour.
- The mat's raised edge is made to make it easy for traffic on wheels to pass over it.
- The simplicity of the edging allows for simple clipping into one another.
- The edging is appropriate for the Solid Fatigue Step, Fatigue-Step, and Fatigue-Step Grid Top.

Parts

Part Number	Size	Colour	Weight (kg)
SS010002B1F	75 mm x 1 m	Black	1
SS010002B1M	75 mm x 1 m	Black	1.3
SS070002B1F	75 mm x 1 m	Yellow	1
SS070002B1M	75 mm x 1 m	Yellow	1.3
